Profile

Motivated IT undergraduate specializing in **Data Science** with strong skills in **full stack and backend development** with **2+ years of project-based experience and 6 months+ professional Experience** and with hands-on experience in Generative AI, LLM integration, and machine learning application development with **1+ years of project-based experience**. Skilled in building AI-driven systems. Experienced in backend development, ML model deployment, chatbot integration, and cloud-based solutions on Azure and AWS. Strong foundation in Python, JavaScript, and full-stack development with a proven ability to design production-ready features, optimize model behaviour, and collaborate on technical problem-solving.

Professional Experience

01/2026 – Present
Colombo, Western
Province

GroovyMark(Pvt) Ltd ☑

Full Stack Developer

As a Full Stack Developer Intern, I was responsible for developing, enhancing, testing, and maintaining web-based applications across both frontend and backend environments with AI automation. My work involved implementing user interfaces from Figma designs, developing new application features, modifying database structures, integrating APIs, and improving existing systems based on client and supervisor requirements. I participated in the complete software development lifecycle, including requirement analysis, UI/UX implementation, backend development, database management, quality assurance testing, bug fixing, deployment, and production support. Additionally, I deployed and maintained applications on VPS and cPanel hosting environments, troubleshooted server and database issues, and collaborated with clients and team members to deliver scalable and user-friendly web solutions.

Technologies: PHP, MySQL, JavaScript, HTML, CSS, Bootstrap, Automation, cPanel, VPS Hosting, Figma, QA Testing.

Education

BSc (Hons) in Information Technology (Specializing in Data Science)

Sri Lanka Institute of Information Technology (SLIIT)

Dean's List: GPA above 3.7 (First Year – Second Semester)

Dean's List: GPA above 3.7 (Third Year – First Semester)

GCE A/L – Physical Science Stream

R/Sumana Balika Vidyalaya

ICT B | Combined Maths C | Physics S

GCE O/L – 5A's including Mathematics and ICT

Skills

- Attention to detail
- Time management
- Self-starter
- Fast learner
- Team collaboration
- Clear communicator

Technical Skills

Languages

JavaScript, Java, Python, SQL, C, C++, R, HTML, CSS

Databases

MongoDB, MySQL

ML/Data

scikit-learn, embeddings, prompt engineering, PEFT fine-tuning

Frameworks & Libraries

React.js, Next.js, Node.js, Express.js, MUI, Streamlit, LangChain

Tools

Git, GitHub, Postman, Figma, VSCode, Docker,, Vercel

Cloud

Azure (VMs, Blob, VNet), Azure OpenAI, AWS basics

Projects

02/2026 – 03/2026

Edibear – Kids Learning & Resource Platform [🔗](#)

Developed and enhanced a pre-existing educational web platform based on client-provided Figma designs. Implemented frontend UI improvements, new e-commerce functionalities, product and order management modules, category/grade/language-based filtering, and educational activity pages. Modified backend functionalities and database structures to support cart management, order processing, product administration, and content management. Collaborated with clients through multiple review cycles to implement design revisions and ensure compliance with project requirements. Deployed the application on a cPanel hosting environment for client review and testing.

Technologies: PHP, MySQL, HTML5, CSS3, JavaScript, Bootstrap, jQuery, phpMyAdmin, cPanel, Figma.

2025 – Present

Document Intelligence Assistant (RAG-based PDF Question Answering) [🔗](#)

Python, LangChain, ChromaDB, HuggingFace Embeddings, OpenAI API, RAG Architecture, PDF Parsing (PyMuPDF)

- Built a full Retrieval-Augmented Generation (RAG) pipeline: PDF parsing, text chunking, embeddings, vector search, and LLM response synthesis.
- Used **Sentence-Transformer embeddings** and **ChromaDB** for semantic retrieval.
- Integrated **OpenAI GPT-4o mini** to generate context-aware answers with hallucination control.
- Designed chat interface with **typing animation, avatars, and persistent chat history** for ChatGPT-style UX.
- Implemented safe state management and optimized Streamlit performance.
- Suitable for enterprise document search, HR onboarding manuals, contracts, resumés, SOPs, and compliance documents.

06/2025 – 11/2025

Disease Prediction System

ML, Streamlit, Python

- Built a multi-class disease likelihood predictor (RandomForest, XGBoost, Decision Tree, HistGradientBoosting). Implemented text normalization, median imputation, label encoding; surfaced confidence indicator + disclaimer.
- Tech: Python, scikit-learn, Pandas, NumPy, Streamlit.

Repo: github.com/AmandaBND/Disease_prediction_system [🔗](#)

06/2025 – 11/2025

Trip Safety AI – Multi-Agent Travel Risk Advisor

Python · Streamlit · GPT-4o mini · Simple NLP · Azure Deployment

- Built a multi-agent advisory system that aggregates weather patterns, incident data, and rules-based heuristics to generate travel safety guidance.
- Integrated GPT-4o mini for natural language reasoning and emergency advisory responses. Implemented a chatbot module to deliver contextual answers, deployed with Azure cloud hosting for reliable access.

Repo: github.com/chamidugunathunga1212-coder/Trip-Safety-Agent-Ai [🔗](#)

01/2025 – 06/2025	Deshini Plant Nursery System MERN Stack project - Built e-commerce features and an admin dashboard (inventory, analytics) with secure auth and clean REST endpoints. - Developed a voice-controlled plant care assistant with query management and chatbot guidance. - Tech: MongoDB, Express, React, Node, MUI. Repo: github.com/AmandaBND/Deshini-plant-nursery
01/2025 – 06/2025	WealthWave – Personal Finance Tracker Android, Kotlin - Built a finance tracking app enabling users to record income, expenses, and budgets. - Implemented category-wise analytics with data persistence using SharedPreferences.
07/2024 – 11/2024	Bus Ticket Reservation System Java Designed a full-stack application for bus reservations with integrated expense tracking and user-defined budget management.

Certificates		
Dean's List Certificate Awarded twice for outstanding academic performance , achieving a GPA above 3.7 during the first year, second semester and Third year First semester of the BSc (Hons) in Information Technology program specialized in Data science.	Azure (Microsoft) Intro to Azure VMs; Add & Size Disks; Configure Azure Blob Storage; Configure Virtual Networks; Azure Load Balancer; VM Availability (2025)	AWS (SimuLearn) Computing Solutions; File Systems in the Cloud; Connecting VPCs; Networking Concepts; Auto-Healing & Scaling; Highly Available Web Apps; Intro to Amazon S3 (2025)

Volunteer Experience	
2024 – Present	Rotaract Club – SLIIT Volunteer Participated in community projects developing teamwork, event management, and leadership skills.
